-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-4, 9 and 12-14** are rejected under 35 U.S.C. 102(b) as being anticipated by Collins et al. 5,276,968.

Collins et al. et al. discloses a cutting head for a brush cutter, the head being of the type including a passage (**Fig. 4**) for a cutter string and a moving element for locking the string, suitable for locking the string between itself and a backing wall, the head having a locking element presents a section in a direction extending transversely to the string (**31**) that presents at least one indentation, with contact being made between the locking element and the string at least on either side of the indentation; the locking element includes arrangements for gripping the string; the gripping arrangements comprise teeth (**84**); the locking element includes a longitudinal groove (**Fig. 4**); the locking element is of section substantially complementary to the section of the string; the locking element comprises a cam (**at 84**); the locking element comprises a shoe that is movable in translation; and a motor (**33**) suitable for driving said head in rotation.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3723

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 5-8, 10 and 11** are rejected under 35 U.S.C. 103(a) as being unpatentable over Collins et al.

Collins et al. is described above. Collins et al. does not specifically disclose a shape of the groove. However, to design grooves with different shapes is a matter of engineering expedience. Therefore, it would have been obvious to one having ordinary skill in the art to have made the grooves of Collins et al.'s apparatus to have different shapes as a matter of engineering expedience.
